10:45 NFT's & the Metaverse

Rick Harmsen, Crypto specialist - DataExpert

The impact that cryptocurrencies and blockchain technology have on the society is undeniable. Thousands of cryptocurrencies are there to invest in and being developed on multiple blockchains. This technology has evolved through the years to a certain point where use cases amongst the public are rising to the surface.

One of those developments are digital items also known as NFT's (non-fungible tokens). Well-known companies are investing in or creating digital art, buying digital pieces of land and much more which all comes together in a whole new (digital) world: the Metaverse!

Interested in how the metaverse looks and works? How criminal activity can be traced in the metaverse and how this will change investigations and compliancy? Join this session and dive with us into the....METAVERSE!

13:15 Fighting Cryptocurrency Crime

Pieter Jenniskens, Senior Solutions Architect Chainalysis

Exploring real life examples of cryptocurrency crime. What tools are available to help Law Enforcement solve these cases. We will be discussing the more "traditional" bitcoin crime, as well as DeFi and NFT cases.
